Product overview

Xperia™ Z3

- 20.7 MP camera with 4K video: high quality images & videos
- High dust tight and water resistance rating – IP65 and IP68
- Long-lasting battery
- Ultra fast performance: Snapdragon 801 Quad-Core 2.5 Ghz processor and 3 GB of RAM

Only the best

The Xperia™ Z3 blends design and engineering craftsmanship to deliver beauty. It's super-slim rounded aluminium frame, uniquely designed power button and durable tempered glass panels, give it an elegantly premium finish. Plus, with an easy-to-use interface and symmetrical design, it feels right at home in your hand.

With market leading waterproofing, you can take pictures in the rain or in the pool, even with an open headphone jack – so dive to new depths and capture every single moment, in detail.

The Xperia™ Z3's Snapdragon 801 processor offers speeds up to 2.5 Ghz for lightning-fast web-browsing, super-fluid interactions and impressive multi-tasking, all while maintaining optimum battery power. So whether you want to listen to your favourite albums online, download important documents, or lose yourself in the latest movies, the Xperia™ Z3 pushes the capabilities of power to give you an impressive battery life.

All the latest camera technology from Sony

The Xperia™ Z3 features a unique combination of Sony Cyber-shot™ and Handycam® technologies to help you capture the moments that matter most, in the highest quality. Good is capturing the moment. Great is enhancing it with low-light capability and ISO 12800 sensitivity in a smartphone.

The Xperia™ Z3's 2.3-inch ExmorRS™ for mobile sensor and BIONZ™ for mobile processing engine work together to capture every striking detail – for photos and videos with less noise, better exposure and vivid colours, even in lowlight. And you can fit even more into every shot with the new 25 mm wide-angle Sony G Lens, so you never miss out on all the action.

You can pause and resume filming, in super-clear 4K resolution. Plus, Sony's new and improved SteadyShot™ technology helps you shoot videos that are seamlessly smooth and stable.

Unrivalled entertainment

Sony is continuously developing the best sound technology for crystal clear listening and astounding acoustic performance.

Good is having all your music in one place. Great is making your favourite tunes sound even better. Our digital amp technology, uniquely developed for High-Res audio, reduces distortion and noise at wider frequency ranges, to reproduce high frequency sound in amazing detail. Plus, you can immerse yourself in superior audio and upscale your low-resolution music to enjoy it in better quality with DSEE HX. And with Sony's Digital Noise Cancelling technology, exterior noise can be reduced when paired with a DNC headset.

Sony's online services make finding your next favourite album easy. Choose from our vast library of millions of songs with Music Unlimited and lose yourself in the soundtrack to your life.

From breathtaking colour, to pixel-perfect resolution, Sony knows it's the details that make the difference. Whether you watch the latest movies, browse the web or view pictures on the go, Sony's TRILUMINOS™ Display technology, X-Reality™ for mobile and ultra-bright displays mean you are guaranteed the best picture quality, wherever you are.

Positioning – location based services

Supported standards:

- OMA Secure User Plane Location (SUPL) v1.0 and v2.0
- 3GPP™ Control Plane location (incl. Emergency location)
- Qualcomm® GPSOneXtra™

Supported satellite systems:

- GPS
- GLONASS
- BeiDou

NOTE: GPS, GLONASS and BeiDou are used together to calculate the position. Positioning is available at more locations and more *accurate if all three systems are used. The benefits of using GLONASS and BeiDou are automatically available for all applications using the positioning APIs.*
